CS:4400 Weekly Report

Team #5

For each meeting we will answer the following questions:

- List all the meetings held with duration of each meeting
- What did we do this week?
- Where do we need help?
- Did we face any problems?
- What is our plan for the next week?

1. We met online to discuss our future work and meetings. We have to complete three assignments, so we decided to split up the work in the following way.

   We met on Zoom to normalize the database for about 2 hours and then we assigned the rest of the tasks that were remaining.

   Piotr – Write and modify all procedures and our website

   Jacob – Update DDL, add foreign keys to the new tables, modify insert statements

   Sriram – Label and do a write up of our database normalization
