CS:4400 Weekly Report

Team #5

For each meeting we will answer the following questions:

- List all the meetings held with duration of each meeting
- What did we do this week?
- Where do we need help?
- Did we face any problems?
- What is our plan for the next week?

1. We met on Monday for about 30 minutes to discuss some details about the project. We went over our queries and data attributes to make sure they are all complete well. Since we completed all of the assignments, there is nothing else to do.
2. We met on Friday for 3 hours to complete the ER diagram. We did a rough draft and we will meet next week to review and submit the assignment. We are starting to think about which programming languages and tools we want to use for the website.
